

# Data Centre Hosting

Enabling seamless **business continuity.**

At Silver Lining we offer a wide range of hosting services including dedicated and virtual environments, storage, security, back-up and disaster recovery solutions.

Our dedicated data centres keeps your critical business data secure and off-site whilst our data backup packages mean we can have businesses backed up and running from failure or interruption.

- What is your Business Continuity Strategy?
- How do you ensure all your data is backed up and recoverable easily?
- How long can you afford to be without critical applications such as email and file server?
- Where do you store your VM backups?

## Dedicated servers

Silver Lining can offer dedicated servers that include internet connections of up to 10Gb. As the service is bespoke you even have your choice of OS and optional control panel software. Select a pre-configured model or customise your server yourself to your own specification.

## Managed servers

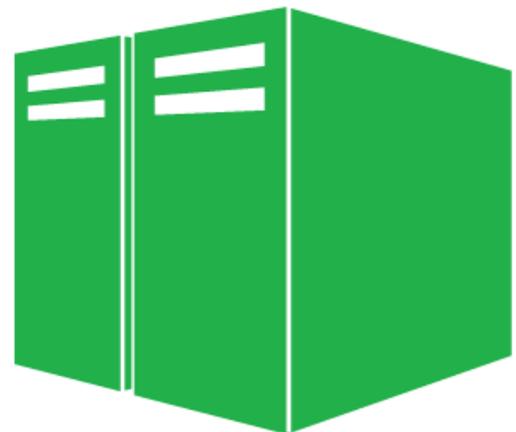

Sometimes an off-the-shelf hosting account or dedicated server just isn't suitable. Silver Linings Managed Services team can design, build, scale, maintain and support a hosting solution tailor-made to your unique requirements.

## Co-location

Silver Lining can offer access to our state of the art, scalable data centre facility, a facility where you can easily manage your own IT environment without the headache of having to look after your own data centre. Our safe, secure, temperature controlled data centres provide the ideal environment for your servers to thrive in.

## Hosting

Silver Lining knows, from talking to our customers, that what they like best about Silver Lining is their ability to offers them reliable, no-nonsense, hosting services. Services which include email, web, telephony and IT all in one place delivered over a

secure and resilient connection, A service which delivers superb uptime, excellent speed and includes friendly UK-based support.

## SLAs

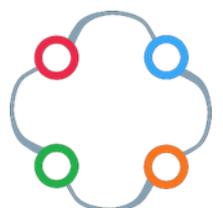

Silver Lining work to ensure SLA's and support fits your specific requirements. Our support desk and ticketing system ensures networks are managed and monitored 24x7 through proactive management ensuring availability is maintained at 100% for fully resilient networks.

## Support

The benefits to your customers of utilising our MPLS network include better performance, lower total cost of ownership, greater flexibility to accommodate new technologies, better security and survivability.
