## EtherReach Leased Lines

Wireless connectivity with the power of fibre.

**A breakthrough product, EtherReach offers all the speed and reliability of fibre optic connections, at lower cost and installed in as little as five days.**

At Silver Lining we pride ourselves on our ability to enable you to offer customers a complete end-to-end connectivity solution.

### Leading edge technology

Delivered via our secure, high performance radio network, EtherReach is available in areas where traditional connectivity is unavailable or prohibitively expensive. EtherReach does not suffer from cable breaks and other physical faults associated with traditional "last mile".

### Five day lead time

Installed within days, not weeks, EtherReach breaks new ground in time critical environments and offers a compelling alternative to traditional lead times of 60 days or more.

### Dedicated bandwidth

Unlike shared services where available bandwidth varies, especially at peak times, EtherReach is a dedicated service that guarantees bandwidth availability at all times. This makes EtherReach an ideal solution for voice and data networks.

### Unlimited usage

No usage caps, traffic management or packet shaping. Your leased line is yours to use as you see fit.

### 24/7 support

Our SLAs are backed by a team of dedicated support professionals as well as advanced proactive network monitoring.

### SLAs

We offer a 4hr SLA as standard on all radio circuits deployed as well as offering customers access to a manned 24x7 helpdesk with dedicated contact points.

### Monitoring and alerting

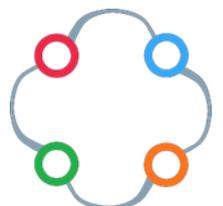

24x7 monitoring and alerting ensure the timely communication of security incidents through the management chain and ultimately to any affected customer.

### Security policy

We maintain and update a general Information Security & Access Policy annually in line with ISO/IEC 2700. This policy details employee's responsibilities toward all types of assets, management's role, training, confidentiality of customer data and acceptable use of resources, etc. - all of which is mandatory.
