

Hosted Exchange

the ultimate in email delivery

TheCloud Exchange delivers the very latest technological email platform on the market from Microsoft.

Accessed from our central core, your customers can see their email wherever they might be, allowing them to respond to the demands of the modern world.

- Simplify administration via a virtual IT team
- Built in Business Continuity without the cost
- Seamless migration that minimises risk
- Removes restrictions and increases flexibility

Advanced security

Silver Lining Exchange combines built-in anti-spam and encryption technologies with an advanced anti-virus infrastructure for efficient management of a wide range of security threats businesses face today.

TheCloud Web Application

Silver Lining Exchange has a built in Web Application helping users to be more efficient and productive across platforms and locations, providing them access to email, voicemail, instant messaging and text messages.

Mobile Sync

Silver Lining Exchange offers ActiveSync /Direct Push to mobile devices. Users can access a universal inbox with email, voicemail, rights-protected messages and instant message conversations.

Email archiving retention and discovery

Silver Lining Exchange service can offer built-in integrated email archiving, retention and discovery capabilities of emails, simplifying the process of preserving business communications.

Information protection and control

Silver Lining Exchange tools monitor sensitive content in emails and controls accidental and unauthorised distribution. These tools include automated alerts about organisational policies and rules that block, redirect, encrypt and modify messages.

Deployment flexibility

Deployed from within our core cloud environment, Silver Lining Exchange enables your customers to save on upfront IT infrastructure costs and helps meet regulatory requirements.

The benefits of Hosted Exchange

- Built in Business Continuity – no single exchange server.
- Freedom to work from anywhere via Outlook Web App, iPhone, BlackBerry, Android and Windows mobile devices
- Lower infrastructure costs – no need to invest in servers, storage, back-up, racks or licensing
- Quickly and easily add and remove users as businesses require
- On demand licencing model, only pay for what you use

How it works

Silver Lining have built highly available infrastructure that allows you to 'tap into' services available. Each application available is built on redundant servers and VM's to ensure availability is high. You only require a data Connection to our data Centre via a web browser for full access to email form us as well as a whole host of other applications

Highly available email access from any device or location in the world.

More than just an IT provider

Here at Silver Lining we don't just help you supply IT services. Together with our voice, connectivity and networking options, we can offer complete unified communications creating partnerships with you and your business customers.

We empower you to become a highly agile business by accessing the latest technology without the burden of infrastructure and software costs.
