

ISDN vs. SIP

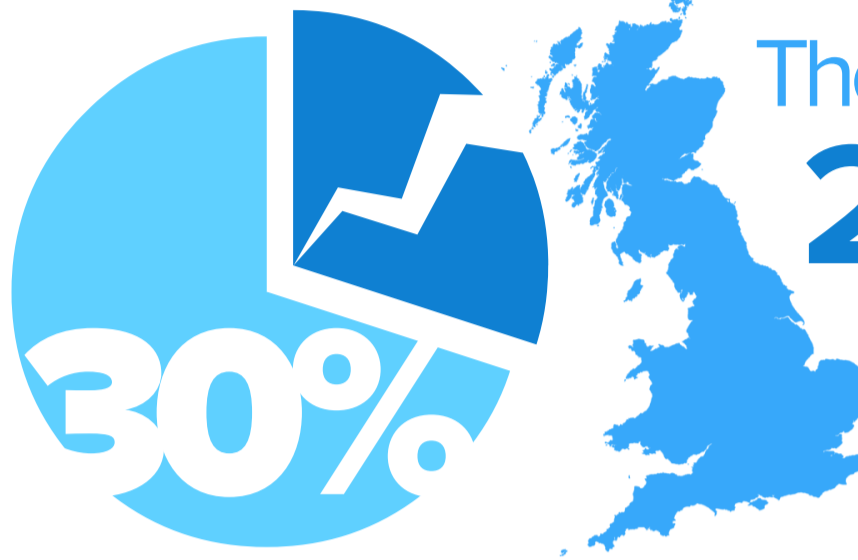

OUT WITH THE OLD, IN WITH THE NEW

ISDN uses traditional copper telephone lines

SIP delivers voice and data via the Internet

ISDN IS ON THE WAY OUT

Over the last **5 YEARS** ISDN channels have declined in use by

There are now nearly **2 MILLION SIP trunks** in the UK

have announced a target date of **2025** to decommission the ISDN network

ISDN VS. SIP: THE NEW KID ON THE BLOCK

	ISDN	SIP
...is it SCALABLE?	STATIC across blocks of 2, 30, etc.	DYNAMIC based on bandwidth
...is it PORTABLE?	ALLOCATED phone numbers with service	SEPARATE numbers, incl. non-geographic
...is it COMPATIBLE?	LIMITED to traditional voice calls	ENHANCED with video calls, data and more
...is it CAPABLE?	TRADITIONAL calls on single connections	HD QUALITY across high bandwidth
...is it AFFORDABLE?	FULL PRICE internal calls route externally	FREE internal calls via company LAN
...is it RELIABLE?	UNSTABLE in the event of downtime	100% UPTIME resilient business continuity
